Dr. Milton Mattox

AI-Era Leadership Development Services

Transform your leadership capabilities for today's technology-driven business landscape. Dr. Milton Mattox's executive development programs combine decades of C-suite experience with cutting-edge AI expertise to help leaders navigate digital transformation with confidence and clarity. Whether you're an established executive or an emerging leader, our personalized coaching and facilitated roundtables provide the strategic insights and practical tools needed to excel in the intelligence revolution.

Executive Tech Leadership Accelerator

6-Month Comprehensive Program

Our flagship executive coaching program is designed for senior leaders navigating the complexities of technology-driven business environments.

- Bi-weekly one-on-one coaching sessions
- Leadership assessment and personalized roadmap
- Focus on technology executive challenges and opportunities
- Strategic planning and implementation support

Investment: $2,000-3,000 per month

AI & Cybersecurity Leadership Mastery

3-Month Intensive Program

This specialized program helps leaders develop the specific skills needed to lead in AI and cybersecurity contexts with weekly one-on-one coaching sessions.

Focus areas:

1. Developing measurable AI implementation plans with clear ROI metrics
2. Cultivating leadership attributes specifically needed for leading teams in the AI era
3. Implementing effective change management strategies for AI integration

Technology strategy development is a core component of this program.

Investment: $2,500-3,500 per month

Strategic Innovation Leadership

Building innovation ecosystems within organizations

Create structures that foster continuous innovation and technological advancement

Developing talent strategies for emerging tech disciplines

Attract, develop and retain top talent in AI and cybersecurity fields

Creating governance frameworks for responsible technology deployment

Establish ethical guidelines and oversight mechanisms for new technologies

Balancing innovation with operational excellence

Maintain business performance while driving technological transformation

This 4-month program helps senior leaders drive technological innovation and digital transformation. Includes quarterly innovation roadmap development.

Investment: $2,200-3,200 per month

Emerging Leader Accelerator

Designed specifically for new managers and first-time leaders, this 6-month program provides comprehensive leadership development with a technology focus.

1 **Leadership style assessment and personalized development plan**

Discover your unique leadership strengths and create a tailored growth roadmap

2 **Critical management skills development**

Master essential skills including team building, delegation, and delivering effective feedback

3 **Technology leadership fundamentals for the AI era**

Develop the specific competencies needed to lead in technology-driven environments

4 **Monthly progress check-ins and adjustment sessions**

Regular evaluation and course correction to ensure continuous improvement

Program includes bi-weekly coaching sessions (90 minutes) with optional group coaching sessions with peer leaders (4-6 participants). Corporate packages available for organizations developing multiple leaders.

Investment: $1,200-1,800 per month

Leadership Innovation Circle

Executive Roundtable Program

Our exclusive virtual roundtable brings together 5-8 executives for monthly 2-hour facilitated discussions focused on peer learning, shared challenges, and collaborative problem-solving.

Each session includes:

1. Pre-session reading/case study
2. Structured discussion on a key leadership or technology topic
3. Peer advisory segment where executives present challenges for group input
4. Implementation planning and accountability

Program includes quarterly individual check-in sessions (60 minutes) and offers an annual membership option with 10% discount.

Investment: $1,500-2,000 per executive per month

Next-Gen Leadership Circle

Our Emerging Leader Roundtable brings together a virtual cohort of 6-10 emerging leaders for bi-weekly 90-minute facilitated sessions focused on developing essential leadership skills for the AI era.

Skill-building modules

Expert-led training on essential leadership competencies

Peer mentoring

Collaborative learning through shared experiences

Accountability partnerships

Paired support system between participants

Real-world challenges

Presenting and solving actual leadership situations

Program includes monthly group office hours for specific challenges and access to an online community platform for ongoing connection. Corporate packages available for organizations sending multiple participants.

Investment: $750-950 per participant per month
